Introduction

My idea is to develop a website which can promote my restaurant and the goal of my project is to be able to create such a website which I can use to promote my restaurant The benefits of it will be that more customers will be attracted to my restaurant as well as I can have more sell in the mean time I'll get to learn bootstrap

Expected list of features

In features I want my website to showcase my restaurant and as well as I want to show case myself I want everyone to know what is my restaurant what you can get there

Market Survey

There are many websites which has similar idea like and the features are also same like the home page where the showcase there cuisine and the about us page and the online booking page
